

Harshit Chauhan

FRONTEND / WEB DEVELOPER · COMPUTER ENGINEERING STUDENT

harshitsinhchauhan250@gmail.com / +91 84549 63092 / hxrshdev.vercel.app / github.com/harsh4k / linkedin.com/in/harshit-chauhan / Mumbai, India

Computer Engineering student and developer who builds production React and TypeScript websites, plus side projects spanning full-stack web apps, CLI tools, and local AI assistants. I like owning things end to end — from idea and design through build, deployment, and polish — and care about clean, maintainable code and interfaces that actually feel good to use. Endlessly curious about space, astronomy, and how things are engineered — I learn best by pulling things apart and building my own version.

EXPERIENCE

Junior Developer Intern — Synapical 2026 – Present

- Contributing to the agency's web builds using Next.js, TypeScript, and Tailwind CSS.
- Working within an existing codebase and team conventions on real client-facing product work.

Freelance Web Developer 2025 – Present

- Build and deploy production websites for clients using React, TypeScript, and modern tooling.
- Gather requirements directly from stakeholders and translate them into working applications.
- Own deployment, domain configuration, hosting, and post-launch maintenance end-to-end.

PROJECTS

Velsaro — velsaro.in

CLIENT · LIVE

Luxury perfume e-commerce platform.

- Responsive storefront with authentication, routing, and reusable UI components.
- Integrated live payments (Razorpay), CMS-driven content, and error monitoring.
- Managed full deployment lifecycle including domain setup and post-launch updates.

React · TypeScript · Vite · Tailwind CSS · Supabase · Sanity · Razorpay · Vercel · Sentry

NexCart — nexcart-v1.vercel.app

PERSONAL · DEPLOYED

Full-stack e-commerce platform.

SKILLS

LANGUAGES

JavaScript, TypeScript, Python, Java, C

FRONTEND

React, Next.js, HTML, CSS, Tailwind CSS, Vite

BACKEND & DB

Supabase, PostgreSQL, Node.js (basics)

TOOLS

Git, GitHub, VS Code, Vercel, Figma, Sentry

EDUCATION

B.Tech, Computer Engineering

MPSTME, NMIMS University · Mumbai

2025 – 2029 · CGPA 7.72 / 10

HACKATHONS

- Smart India Hackathon
- Adapt
- Adapt 2.0
- Cyber Cypher

- Mobile-friendly shopping app with responsive browsing and reusable component architecture.
- Optimised frontend performance; deployed and maintained via modern hosting workflows.

React · TypeScript · Vite · Tailwind CSS · Vercel

Rudo — github.com/harsh4k/rudo

PERSONAL · AI

Local AI assistant (Gemma 3 via Ollama) with a terminal chat UI.

- Streaming replies, persistent memory, and markdown/code rendering in a custom terminal interface.
- Tool use — shell commands, web search, file reads, notes indexing (RAG), plus voice in/out.

Python · Ollama · Gemma 3 · nomic-embed-text (RAG)

Shipd

COMPLETE

Command-line developer tool
(PowerShell).

github.com/harsh4k/shipd

Edith

DEPLOYED

Python system monitor — real-time
CPU / GPU / RAM tracking.
